25X1 3. It is these long range orders are mount to fill gaps in the Russian Five Year Plan. Plants which receive such orders are supplied with all necessary raw materials with the result that many firms do not have room to store all the materials. It is claimed that nearly all firms in the Soviet Sector of Berlin and in the Soviet Zone are either working on Russian orders directly, or else are supplying other firms working on Russian orders. Manufacturers are able to set raw materials only if they can prove they have Russian orders.
